This legislative mandate gives to the Secretary of War the same jurisdiction as heretofore possessed by Congress in this respect.

§ 2.21 *Undue delay as bar to relief.* An application for the correction of a military record as provided in section 207 may be refused by the Board on the ground that there has been undue delay in filing the application.

§ 2.22 *Application for relief.* (a) The applicant for relief will submit a written request to the Secretary of War, Attention: Board on Correction of Military Records. The request should be made on WD AGO Form 562, which may be obtained from The Adjutant General, Attention: AGPI, Washington 25, D. C.

(b) The application shall include:
(1) The full name, Army serial number, grade and organization or assignment of the person whose military record is involved.

(2) A description of the military record sought to be corrected.

(3) A particular description of the alleged error or injustice sought to be corrected or removed.

(4) The reasons in support of the relief requested.

(5) The full name and address of counsel if the applicant desires to be so represented.

(6) A request for a hearing before the Board in Washington, D. C., if the applicant so desires.

(7) The full name and address of any witness or witnesses whose testimony the applicant may desire the Board to consider at the hearing. The nature of each witness' testimony, or the principal facts concerning which he will testify, should be indicated.

(8) Any statements or affidavits from persons other than the applicant in support of the request for relief.

(9) Signature of the applicant.

(c) The application shall be executed under oath or shall contain a provision that the statements submitted in the application, as part of the claim, are made with full knowledge of the penalty provided for making a false statement.

(d) Upon request of the Board, The Adjutant General will assemble the originals or certified copies of all available War Department records pertinent to the relief requested. Such records together with the application and all supporting documents will be transmitted to the Chairman of the Board.

§ 2.23 *Proceedings of Board.* (a) The Board will be convened at the call of the Chairman and will recess or adjourn at his order.

(b) The Board will assemble in open or closed session for the consideration and determination of cases presented to it. Cases in which no request for hearing is made by the applicant will be considered in closed session on the bases of all documentary evidence presented to it, and any briefs submitted by or on behalf of applicant.

(c) A reporter will record the proceedings of the Board in open session and the testimony taken before it.

§ 2.24 *Hearings.* (a) An applicant for the correction of a military record, upon request, shall be entitled to appear before the Board in open session, either in person or by counsel of his own selection. At the discretion of the Board, the applicant may present witnesses to testify in support of his claim. As used in §§ 2.20 through 2.29, the term "counsel" will be construed to include members of the Federal bar in good standing, the bar of any State in good standing, accredited representatives of veterans' organizations recognized by the Veterans' Administration under section 200 of the act of 29 June 1936 (Pub. Law 844, 74th Cong.), and such other persons who, in the opinion of the Board, are considered to be competent to present equitably and comprehensively the claim of the applicant for review. In no case will the expenses of the applicant or expenses or compensation of witnesses or counsel for the applicant be paid by the Government.

(b) In each case in which hearing is requested the Board will transmit to the applicant and to designated counsel for the applicant, if any, a written notice stating the time and place of hearing. Such notice will be mailed at least 15

days prior to the date of hearing to the applicant and his counsel, if any. It will be the responsibility of the applicant to notify his witnesses, if any. The applicant may waive such time limit and an earlier date may be set by the Board. The record will contain evidence that written notice was given the applicant and his counsel, if any, and the time and manner thereof.

(c) An applicant who requests a hearing and who, after being duly notified of the time and place of hearing, fails without cause to appear at the appointed time, either in person or by counsel, shall be deemed to have waived his right to be present, and the Board will have authority to proceed with the consideration and determination of the case.

(d) The hearing will be conducted so as to insure a full and fair inquiry. Neither the applicant nor his counsel will have access to any classified papers or reports of investigation or papers related thereto or any document received from the Federal Bureau of Investigation. When it is necessary to acquaint the applicant with the substance of a document, such as above described, the Director of Intelligence, WDGS, or other appropriate official, on the request of the Board, will prepare a summary of, or extract from, the document deleting all references to sources of information and other matter the disclosure of which, in his opinion, would be detrimental to the public interest. Such summary then may be made available without classification to the applicant or his counsel.

(1) The Board will not be limited by the restrictions of common law rules of evidence.

(2) In order to justify correction of a military record, it is incumbent on the petitioner to show to the satisfaction of the Board, or it must otherwise satisfactorily appear, that the alleged entry or omission in the record was in error or unjust under directives, standards, administration, and practice either existing at the time, or subsequently changed in the petitioner's favor, effective retroactively. The directives, standards, administration, and practice in §§ 2.20 through 2.29 contemplated are those stated in statutes, regulations, manuals, directives of the War Department and other appropriate authority, together with interpretations thereof by the courts, the Attorney General, the Comptroller General and of The Judge Advocate General.

(3) The testimony of witnesses will be under oath administered by the presiding officer or by affidavit. If a witness testifies in person he will be subject to examination by members of the Board.

(4) The Board may continue a hearing on its own motion. A request for continuance by or on behalf of the applicant may be granted by the Board if a continuance appears necessary to insure a full and fair hearing.

(5) The Board may, at its discretion and for good cause shown, permit an applicant to withdraw his application without prejudice at any time before the Board makes its final recommendation.

§ 2.25 *Scope of inquiry.* (a) Unless directed by the Secretary of War, the

Board shall not review any case wherein final action has been taken by the President of the United States, the Secretary, the Under Secretary, or the Assistant Secretary of War. No application will be considered until the applicant has exhausted all remedies afforded him by existing law or regulations.

(b) It shall be adequate ground for denial of any application that effective relief cannot be granted or that a sufficient basis for review has not been established.

(c) The right to apply to the Board for relief shall not operate as a stay of any proceedings taken against the person involved.

§ 2.26 *Findings, conclusions, and recommendations.* (a) The Board will make findings in writing in each case. The findings and conclusions of a majority of the Board will constitute the findings and conclusions of the Board.

(b) In case of a disagreement between members of the Board a minority report may be submitted, either as to the findings, or to the recommendations, or to both. The reasons for the minority report will be clearly stated.

(c) The Chairman of the Board will, in the name of the Board, recommend to the Secretary of War such action as may be necessary to carry into effect the determinations of the Board.

§ 2.27 *Disposition of proceedings.* (a) When the Board has concluded its proceedings in any case, the Board will prepare a complete record thereof. Such record will include the application for relief; a transcript of the hearing, if any; affidavits, papers, and documents considered by the Board; all briefs and written arguments filed in the case; the report of the examiner, if any; the findings and conclusions of the Board and its recommendation for corrective action; any minority report prepared by a dissenting member of the Board; and all other papers and documents necessary to reflect a true and complete history of the proceedings. The record so prepared will be signed by the Chairman as being true and complete.

(b) All records of proceedings of the Board in closed session will be confidential.

§ 2.28 *Transmittal of records and action by The Adjutant General.* Upon the approval of the Secretary of War, the record of proceedings and recommendations in each case will be transmitted to The Adjutant General or other proper authority for appropriate War Department action. The Adjutant General will perform such administrative acts as may be necessary, and thereafter will notify the applicant and his counsel, if any, of the action taken. Written notice specifying the action taken and the date thereof will be transmitted by The Adjutant General to the Chairman of the Board.

§ 2.29 *Changes in procedure of Board.* The Board may initiate recommendation for such changes in procedure as established herein as may be deemed necessary for the proper functioning of the

Board. Such changes will be subject to the approval of the Secretary of War.

Chapter II—Administrator of Civil Aeronautics, Department of Commerce

PART 501—AIRCRAFT REGISTRATION CERTIFICATES

Part 501 of the regulations of the Administrator of Civil Aeronautics was last revised on February 10, 1943. Since that time experience has disclosed the necessity for again revising this part by making a few minor changes. It appearing that:

This part, as herein revised, (including these minor changes) was published in proposed form in the FEDERAL REGISTER (12 F. R. 1247) on February 22, 1947; all interested persons, pursuant to such publication, were given an opportunity to submit written data, views, or arguments for consideration in connection with this proposed revision; all such data, views, and arguments submitted by interested persons were considered in the final preparation of the revision of this part which, in its present form as compared to its proposed form previously published in the FEDERAL REGISTER, contains changes of only a minor nature which will not impose any burden upon interested persons; the persons affected by this part (as herein revised) will be greatly benefited by its being made effective without delay; in

view of the foregoing, sufficient notice and public procedure have been afforded to interested persons, and further notice or public procedure would serve no purpose other than to delay the issuance of the revision of this part of the regulations of the Administrator which it is in the public interest and benefit to adopt at this time. And finding that:

Further notice and public procedure provided for in sections 4 (a) and (b) of the Administrative Procedure Act is unnecessary with respect to the revision of this part; and that good cause exists to declare this part (as herein revised) effective immediately pursuant to section 4 (c) of that act.

PART 502—DEALERS' AIRCRAFT REGISTRATION CERTIFICATES

Part 502 of the regulations of the Administrator of Civil Aeronautics was originally made effective on November 15, 1946. Since that date it has become necessary to revise this part in order to grant to bona fide distributors and dealers of used aircraft the same privilege to obtain and utilize dealers aircraft registration certificates as was granted to manufacturers, distributors and dealers of new aircraft under the original Part 502. It appearing that:

This part, as herein revised, was published in proposed form in the *FEDERAL REGISTER* (12 F. R. 1248) on February 22, 1947; all interested persons, pursuant to such publication, were given an opportunity to submit written data, views, or

arguments for consideration in connection with this proposed revision; all such data, views, and arguments submitted by interested persons were considered in the final preparation of the revision of this part which, in its present form as compared to its proposed form previously published in the *FEDERAL REGISTER*, contains changes of only a minor nature which will not impose any burden upon interested persons; the persons affected by this part (as herein revised) will be greatly benefited by its being made effective without delay; in view of the foregoing, sufficient notice and public procedure have been afforded to interested persons, and further notice or public procedure would serve no purpose other than to delay the issuance of the revision of this part of the regulations of the Administrator which it is in the public interest and benefit to adopt at this time. And finding that:

Further notice and public procedure provided for in sections 4 (a) and (b) of the Administrative Procedure Act is unnecessary with respect to the revision of this part, and that good cause exists to declare this part (as herein revised) effective immediately pursuant to section 4 (c) of that act.

Now therefore acting pursuant to the authority vested in me by sections 308, and 501 of the Civil Aeronautics Act of 1938 as amended (52 Stat. 973, 986, 1005, 54 Stat. 1233, 1235, 1236; 49 U. S. C. 401, 458, 521), I hereby revise Part 502 of the regulations of the Administrator of Civil Aeronautics to read as follows:

Sec.
502.1 Basis and purposes.
502.2 Application.
502.3 Requirements.
502.4 Limitations.
502.5 Rules.
502.6 Notice.

AUTHORITY: §§ 502.1 to 502.6, inclusive, issued under 52 Stat. 973, 986, 1005, 54 Stat. 1233, 1235, 1236, 49 U. S. C. 401, 458, 521.

§ 502.1 *Basis and purposes.* The purposes of the regulations in this part are: (a) To prescribe regulations for the registration of aircraft by persons engaged in the business of manufacturing, distributing or selling of aircraft, (b) to facilitate the operation, demonstration, and merchandising of aircraft moving in the ordinary trade channels from the manufacturer, distributor, or dealer to the ultimate purchaser without imposing upon the manufacturer, distributor, or dealer the burden of obtaining an individual registration certificate for such aircraft with each transfer of title as required under the registration provisions of Part 501 of this chapter, and (c) to permit manufacturers to conduct required production flight tests. A dealer's aircraft registration certificate is an alternate form for the registration of civil aircraft from that prescribed by Part 501. Persons engaged in the business of manufacturing, distributing or selling aircraft, upon application, may obtain one or more dealers' aircraft registration certificates issued under the provisions of this part. The basis for this part is found in sections 308 and 501 of the Civil Aeronautics Act of 1938 as amended.

§ 502.2 *Application.* Application for a dealers' aircraft registration certificate shall be made upon a form prescribed by the Administrator and shall be accompanied by the required registration fee.¹

§ 502.3 *Requirements.* To be eligible for a dealers' aircraft registration certificate an applicant shall be a citizen of the United States² with an established place of business located in the United States or any territory or possession of the United States, engaged in the following activities:

- (a) The manufacture of aircraft, or
- (b) The distribution or sale of new aircraft under authority of a franchise, license, letter of authority, agreement, or other arrangement from the manufacturer or his authorized agent, or
- (c) The distribution or sale of used aircraft to ultimate purchasers through ordinary trade channels.

§ 502.4 *Limitations—(a) Operation.* (1) A dealers' aircraft registration certificate shall be valid for the operation of an aircraft only by a person to whom such certificate was issued or by his duly authorized agent or employee.

(2) A dealers' aircraft registration certificate is valid only for an aircraft owned by a person to whom such certificate was issued and which is being operated, (i) in the ordinary trade channels between any two of the following persons: The manufacturer, the distributor, the dealer, or the purchaser from any of such persons, (ii) for demonstration purposes necessary to the sale of such aircraft, or (iii) to conduct required production flight tests.

Transfer of ownership. Whenever the ownership of an aircraft is transferred to

a person who is not the possessor of a valid dealers' aircraft registration certificate, the purchaser shall make application for registration of the aircraft in his name in accordance with the provisions of Part 501 of this chapter prior to the operation of the aircraft.³

§ 502.5 *Rules—(a) Display.* The dealers' aircraft registration certificate shall be carried in the aircraft when operated by the person to whom the certificate was issued, or by his authorized agent or employee.

(b) *Duration.* A dealers' aircraft registration certificate shall expire one year from the date of issuance thereof.

(c) *Transferability.* A dealers' aircraft registration certificate is not transferable.

§ 502.6 *Notice.* The holder of a dealers' registration certificate shall notify the Administrator immediately of any change which affects his status as a citizen of the United States as defined in section 1 (13) of the Civil Aeronautics Act of 1938, or other change of the conduct of his business which affects his eligibility for a dealers' aircraft registration certificate.

This part as revised herein shall become effective May 1, 1947.

Administrator of Civil Aeronautics.

PART 503—RECORDATION OF AIRCRAFT OWNERSHIP

Part 503 of the regulations of the Administrator of Civil Aeronautics was adopted on February 10, 1943. Since that time experience has disclosed the necessity for revising this part by making a few minor changes. It appearing that:

This part, as herein revised (including these minor changes) was published in proposed form in the FEDERAL REGISTER (12 F. R. 1249) on February 22, 1947; all interested persons, pursuant to such publication, were given an opportunity to submit written data, views, or arguments for consideration in connection with this proposed revision; all such data, views, and arguments submitted by interested persons were considered in the final preparation of the revision of this part which, in its present form as compared to its proposed form previously published in the FEDERAL REGISTER, contains changes of only a minor nature which will not impose any burden upon interested persons; the persons affected by this part (as herein revised) will be greatly benefited by its being made effective without delay; in view of

³ Upon the transfer of the ownership of the aircraft to a person who is not the possessor of a valid dealers' registration certificate, the parties to the sale will execute the new form ACA 500 in accordance with the instructions on the reverse side thereof. The portion marked "Part B" shall be retained in the aircraft and will entitle the purchaser to operate the aircraft for 60 days pending registration in his name by the Administrator.

the foregoing, sufficient notice and public procedure have been afforded to interested persons, and, further notice or public procedure would serve no purpose other than to delay the issuance of the revision of this part of the regulations of the Administrator which it is in the public interest and benefit to adopt at this time. And finding that:

Further notice and public procedure provided for in sections 4 (a) and (b) of the Administrative Procedure Act is unnecessary with respect to the revision of this part, and that good cause exists to declare this part (as herein revised) effective immediately pursuant to section 4 (c) of that act.

Now therefore acting pursuant to the authority vested in me by sections 308 and 503 of the Civil Aeronautics Act of 1938 as amended (52 Stat. 973, 986, 1006, 54 Stat. 1233, 1235, 1236; 49 U. S. C. 401, 458, 523) I hereby revise Part 503 of the regulations of the Administrator of Civil Aeronautics to read as follows:

An application containing current data must be submitted each time certificates are requested and may cover as many certificates as are desired at that time. This application is obtained from, and is submitted to, the Aircraft and Components Branch of the Regional Office for the area in which the applicant's business is located. [Priorities Reg. 28, Direction 25, as Amended
April 29, 1947]

PART 803—PRIORITIES REGULATIONS UNDER VETERANS' EMERGENCY HOUSING ACT OF 1946

PRIORITIES ASSISTANCE FOR MERCHANT PIG IRON FOR CAST IRON SOIL PIPE AND CAST IRON SOIL FITTINGS

The following direction is issued pursuant to Priorities Regulation 28:

(a) *What this direction does.* The continued shortage of merchant pig iron, particularly in certain areas, threatens the production of cast iron soil pipe and cast iron soil fittings, critically short for the Veterans' Emergency Housing Program. It is necessary to maintain such production at a high level and for this purpose this direction provides for the placing of certified orders for pig iron for the production of cast iron soil pipe and cast iron soil fittings, after March 31, 1947. This direction is necessary in the public interest and to effectuate the purposes of the Veterans' Emergency Housing Act of 1946.

(b) *Applications and authorizations—(1) What foundries may apply.* Only foundries which make cast iron soil pipe or which make both cast iron soil pipe and cast iron soil fittings may apply under this direction for authorization to place a certified order for merchant pig iron.

(2) *When to file application.* Applications should be filed on Form OHE 14-186 (formerly Form CPA-4570) with the Housing Expediter on or before the 15th day of the month preceding the month in which delivery is required. (Until copies of FORM OHE 14-186 are available, applications may be made on Form CPA-4570.)

(3) *Authorizations.* The Housing Expediter upon receipt of an application on Form OHE 14-186 may authorize the placing by the applicant of certified orders for merchant pig iron required to make cast iron soil pipe and cast iron soil fittings. Authorization will be returned to the applicant in time for the applicant to place his orders with the supplier for the required delivery. Such authorization will not be granted to increase inventories and will only be granted where it is determined that the authorization is necessary to maintain or increase production of cast iron soil pipe and cast iron soil fittings. In making such authorization, the Housing Expediter will take into account the extent to which the applicant in the production of cast iron soil pipe and cast iron soil fittings conserves pig iron through the use of scrap iron.

(4) *Limitation on use of merchant pig iron obtained on certified orders.* Each foundry must put into production in each month for which it receives authorization not less than the amount of merchant pig iron authorized for that month on Form OHE 14-186 to make cast iron soil pipe and cast iron soil fittings.

(c) *Placement of certified orders.* A foundry which receives an authorization on Form OHE 14-186 may certify its order on its supplier for merchant pig iron by furnishing with the order, a certificate in substantially the following form, signed as provided in Priorities Regulation 7.

I certify, subject to the penalties of section 35A of the United States Criminal Code, that I have been authorized to place this order for merchant pig iron under Direction 25 to Priorities Regulation 28, serial number _____.

(1) *Restrictions on placing certified orders.* Orders may be certified for delivery only as authorized on Form OHE 14-186. Thus they must be certified to the suppliers for the amount and in the month indicated on the form when it is returned by the Housing Expediter.

(d) *Certified orders must be treated as rated orders.* Any purchase order certified under this direction must be treated as a rated order under Priorities Regulation 1 and accepted, scheduled and delivered accordingly, except that a producer of merchant pig iron need not accept a certified order received after the 25th day of the month preceding the month in which delivery is required. The provisions of Priorities Regulation 1 will apply except to the extent that this direction is inconsistent with them.

(e) *Reports.* Producers of merchant pig iron and foundries making cast iron soil pipe or both cast iron soil pipe and cast iron soil fittings must furnish such reports as may be required by the Housing Expediter from time to time, subject to approval by the Bureau of the Budget, pursuant to the Federal Reports Act of 1942.

Issued this 29th day of April 1947.

PART 12—AMATEUR RADIO SERVICE

ALLOCATION OF FREQUENCIES AND FREQUENCY BANDS

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of April 1947;

The Commission having under consideration the matter of allocating frequencies to the Amateur Radio Service, and having by separate order dated and effective this date designated as available for the Amateur Radio Service the frequency band 27.160 to 27.430 Mc in lieu of the band 27.185 to 27.455 Mc; and

It appearing, that the allocation of frequencies in the band 27.185 to 27.455 Mc to the Amateur Radio Service, as set forth in the Commission's Order No. 130-L dated January 2, 1947, is inconsistent with the frequency allocations effected by the order referred to in the preceding paragraph hereof; and

It further appearing, that as the change in the allocation of frequencies mentioned in the preceding paragraphs hereof is already in effect, general public notice and procedure for rule making required by section 4 (a) of the Administrative Procedure Act is unnecessary;

It is ordered, That for the purpose of correlating the Commission's orders in the 130-series with the changed allocation of frequencies hereinbefore referred to, the paragraph numbered 2 (a) (4) of the first ordering clause of Order No. 130-L be, and it is hereby amended to read as follows:

(4) 27.160 to 27.430 Mc, using types A0, A1, A2, A3, and A4 emissions, and also special emissions for frequency modulation (radio-telephone transmissions and radio-telegraph transmissions employing carrier shift or other frequency modulation techniques), subject to such interference as may occur from the operation of industrial, scientific and medical devices also assigned to this band and centered on 27.320 Mc.

For the reasons above indicated, this order is made effective immediately.

2. Delete the provisions of (b) (1) of section 4 of the amended agreement and of (b) (1) of § 933.4 *Regulations by grades and sizes* of the amended order and substitute therefor the following:

(b) *Recommendation for regulations.* (1) Whenever the Shippers Advisory Committee deems it advisable to regulate any variety pursuant to this section, the said committee shall recommend the particular grades and sizes or either thereof deemed by it advisable to be shipped, and any such recommendation may include a proposal that shipments of any variety grown in Regulation Area II shall be limited to the grades and sizes different from the proposed grade and size limitation applicable to shipments of the same variety grown in Regulation Area I. In making such determination, the said committee shall give due consideration to the following factors relating to the citrus fruit produced in Florida and in other States: (a) Market prices, including prices by grades and sizes of the fruit for which regulation is recommended; (b) amount on hand at the principal markets, as evidenced by supplies on track; (c) maturity, conditions, and available supply, including the grade and size thereof in the producing areas; (d) other pertinent market information; and (e) the level and trend in consumer income. (c) *Regulation by the Secretary.* Whenever the Secretary shall find from the recommendations and reports of the Shippers Advisory Committee and the Growers Administrative Committee, or from other available information, that to limit the shipment of any variety to particular grades and sizes would tend to effectuate the declared policy of the act, he shall so limit the shipment of such variety during a specified period or periods, and any such regulation may provide that shipments of any variety grown in Regulation Area II shall be limited to grades and sizes different from the proposed grade and size limitation applicable to shipments of the same variety grown in Regulation Area I. Prior to the beginning of any such regulation the Secretary shall notify the Growers Administrative Committee of the regulation issued by him, which committee shall notify all handlers, by pub-

lication in daily newspapers, selected by the said committee, of general circulation in the citrus-producing districts of Florida: *Provided*, That when the regulation as issued is different from the recommendation of the committee, notice thereof shall be given also by mailing a copy thereof to each handler who has filed his address with said committee for this purpose.

The Fruit and Vegetable Branch, Production and Marketing Administration, has proposed that consideration be given to such other changes in the provisions of the amended marketing agreement and order, as may be necessary to make the entire amended marketing agreement and order conform with the proposed amendments contained in this notice of hearing.

SHIP SERVICE

NOTICE OF PROPOSED RULE MAKING

In the matter of amendment of Part 8 of the rules and regulations governing ship service to establish a 5-year regular term for ship station licenses and to establish the ship radar station with a 5-year license term as a new class of station within the ship service.

Notice is hereby given of proposed rule making in the above-entitled matter.

The proposed rules and regulations, which are amendments of and additions to existing rules and regulations, are set forth in this notice.

The proposed rules are issued under the authority of section 301 and sections 303 (b), (c), (e), (f), (j) and (r) of the Communications Act of 1934, as amended.

The amendment of § 8.20 and 8.21 of the existing rules is for the purpose of showing that the terms "maritime mobile service" and "ship service" as used in Part 8 of the rules do not apply generally to ship radar stations. The amendment of § 8.61 of the existing rules is for the purpose of making the license term of ship station and ship radar station licenses uniform. The addition of new § 8.195 is to provide particulars covering ship radar stations.

Any interested person who is of the opinion that these proposed revisions of the rules should not be adopted, or should not be adopted in the form set forth, may file with the Commission, on or before May 19, 1947, a written statement or brief setting forth his comments. Before final action is taken, all comments received will be considered, and if any comments are received which appear to warrant the Commission's holding an oral argument, notice of the time and place of such oral argument will be given.

1. Sections 8.20 and 8.21, respectively, are amended by inserting the notation "22" after the term "maritime mobile service" in § 8.20 and after the term "ship service" in § 8.21.

2. The following footnote is added (cf. paragraph 1 above):

²² The term does not apply to the use of radar installations on board ship except where radar is specifically mentioned.

3. Section 8.61 is amended to read as follows:

§ 8.61 *Ship station license.* All new, renewed, or modified ship station licenses normally will be issued to expire at 3:00 a. m., e. s. t. on a date 5 years from the date on which they became effective.

4. The following new rules governing ship radar stations are added after § 8.192:

SHIP RADAR STATIONS

§ 8.195 *Ship radar stations.*—(a) *Ship radar station.* The term "ship radar station" means a radio station located on board a ship licensed for the transmission of energy by radio for the purpose of automatically detecting land and other objects through the reception of the effects of such transmission, with or without a determination of their direction and distance from the ship.

(b) *Applications for ship radar station licenses.* Applications for ship radar station licenses shall be made in accordance with the provisions of Part 1 of the Commission's rules and regulations.

(c) *Term of ship radar station licenses.* All new, renewed, or modified ship radar station licenses normally will be issued to expire at 3:00 a. m., e. s. t., on a date 5 years from the date on which they became effective.

(d) *Posting of ship radar station license.* The ship radar station license shall be posted in a conspicuous place at the principal operating position.

(e) *Station identification.* Section 2.65 requiring station identification by call letters shall not apply to ship radar stations. For administrative purposes, the call letters assigned to a ship radar station normally will be the same as the ship station call letters or ship signal letters.

(f) *Authorized emission for radar transmitters.* Any transmitter of a ship radar station which operates within a frequency band allocated in paragraph (g) of this section shall use special (pulsed) type of emission only.^{23a}

(g) *Allocation of frequencies for ship radar stations.* The following frequency bands are allocated for use by ship radar stations:^{23b}

3000 to 3246 Mc
5460 to 5650 Mc
9320 to 9500 Mc

(h) *Frequency tolerance.* All emissions of a ship radar station outside an assigned frequency band shall be attenuated at least 60 decibels below the maximum emission within the assigned frequency band. The frequency at which maximum emission occurs shall not be within 20 Megacycles of either end of an assigned band.

(i) *Frequency measurements.* The licensee of a ship radar station shall

^{23a} For the purpose of this part of the rules, the term "special (pulsed) type of emission" means radio frequency energy which is emitted in the form of short bursts of energy repeated at regular intervals, the duration of each burst being much shorter than the interval between bursts.

^{23b} The associated transmitting frequencies of radar beacons (Racons) are, respectively, as follows: 3256, 5450, and 9310 Megacycles.

take the necessary measures to insure that the transmitter operates within the tolerance limits specified in paragraph (h) of this section.

(j) *Name plate on radar installation.* Each ship radar station installation the manufacture of which was completed on or after June 1, 1947, shall be furnished with a durable name plate with the manufacturer's name, transmitter model number, and month and year of completion of manufacture, permanently inscribed thereon. Such name plate shall be affixed to the indicator housing at the principal operating position.

(k) *External adjustments.* Radar transmitters which have means available for external adjustments, the manipulation of which may cause operation not in accordance with paragraph (h), of this section, will not be licensed in the ship service.^{23c}

(l) *Design and construction.* The design and construction of radar equipment intended for licensing in the ship service shall be such that its use will produce no interference to the radio communication service of any ship.

(m) *Type approval of radar equipment.* To determine the acceptability of radar equipment for licensing in the ship service, such equipment will be examined by duly authorized representatives of the Commission for compliance with the provisions of paragraphs (f), (g), (h), (j), (k) and (l) of this section 5 and if found in compliance therewith, appropriate type approval will be issued.

(n) *Reports.* The licensee, by such arrangement as may be necessary with the ship master, operating agency, or ship owner, shall, upon request of the Commission, be responsible for the submission of such reports as may be required to show the value and performance of a ship radar station.^{23d}

Adopted: April 17, 1947.

[SEAL] FEDERAL COMMUNICATIONS
COMMISSION,
T. J. SLOWIE
Secretary.

^{23c} This provision does not necessarily prohibit the licensing of such radar transmitters experimentally on board ship in accordance with Part 5 of the rules.

^{23d} For assistance in preparing these reports, daily records should be kept showing at least the following:

(a) Number of hours of use while the ship is in operation.

(b) Number of service failures, and duration, nature, and cause of each failure.

(c) Performance under abnormal weather conditions.

(d) Unusual incidents, including, among others, cases in which radar may have aided or hindered safe operation of a vessel.

FEDERAL COMMUNICATIONS COMMISSION

EMPLOYMENT OF SHIP RADIO OPERATORS POSSESSING LESS THAN SIX MONTHS SHIP RADIO EXPERIENCE

STATEMENT REGARDING WAIVERS

APRIL 18, 1947.

The Commission has recently received several requests for individual waivers of the requirement of section 353 (b) of the Communications Act of 1934, as amended, that for safety purposes ship radio

No. 85—3

operators shall, in certain instances, have had at least six months previous experience as ship radio operators.

The Commission has been careful to assure itself, and will continue to do so, that every party who has or may hereafter request a waiver of the above-mentioned statutory safety requirement is fully cognizant of the responsibility he thereby assumes for the safety of the particular vessel on any voyage made as a result of any waiver granted. Because of the safety aspect, the Commission has required each applicant for a waiver to submit a written request and to specify

therein that he has exhausted every reasonable possibility of obtaining a qualified operator with the required experience. The requests received, even if couched in somewhat general terms, have been construed literally to mean that a complete and detailed search for operators at every recognized source within reasonable distance has been made without favorable result. As indicated below, a detailed statement will hereafter be required.

In many cases in which requests for waiver have been received, the application has not contained sufficient information to enable the Commission to take expeditious action, and delay has ensued. The Commission is presently studying the over-all situation with a view to taking such action of a general nature as may be appropriate. However, in order to avoid unnecessary delay on such interim requests for waiver as may be received, the Commission deems it advisable to make clear the procedure to be followed and the minimum information to be presented before action on an application can be taken.

In each case, the request for waiver should be submitted by the owner, charter party, or operating agent of the ship, and the procedure to be followed should be as follows: (1) Exhaust the sources, including appropriate local field engineering offices of the Federal Communications Commission; (2) submit directly to the Commission at Washington, D. C. a written request for waiver which specifies at least the following information: (a) name of ship and port of expected departure, (b) date and time of expected departure, (c) nature of cargo, (d) destination, (e) statement that all recognized sources of ship radio operators within a reasonable distance have been exhausted, including both all union and non-union sources, listing by name the sources contacted and including identification of the local Federal Communications Commission offices contacted, (f) name and description of qualifications of the radiotelegraph operator presently available and intended to be employed under the requested waiver.

VARIOUS CLASSES OF NON-GOVERNMENT SERVICES IN RADIO SPECTRUM FROM 10 KC TO 30,000,000 KC

ALLOCATION OF FREQUENCIES

APRIL 14, 1947.

At a meeting of the Federal Communications Commission, held at its offices in Washington, D. C., on the 10th day of April 1947;

The Commission having under consideration the frequencies 27.185-27.455 megacycles heretofore designated for industrial, scientific, medical purposes, and

that portion of the hearing and oral argument held on December 18 and 19, 1946, "In the Matter of Promulgation of Rules and Regulations Governing Medical Diathermy Equipment and Industrial Heating Equipment" (Docket No. 7858), concerning the advisability of allocating a wider band of frequencies in the 27 megacycle region of the spectrum for such purposes; and

The Commission also having under consideration its recommendation dated February 18, 1947, to the Department of State, for approval at the forthcoming Conference of the International Telecommunications Union that the frequency band 27.160-27.480 megacycles be made available for industrial, scientific, and medical uses and to the amateur, fixed, and mobile services, subject to interference from industrial, scientific or medical operation; and the fact that no objection from interested parties has been received by the Commission to its recommendation which was made after full opportunity for the submission of such objection; and

The Commission having determined that the public interest, convenience and necessity would be served by allocation for use in the United States by industrial, scientific and medical devices of the frequency band 27.160-27.480 mc as set forth in the proposal referred to above, with certain provision for use of such frequencies by the amateur, fixed and mobile services; and

The Commission having further determined that under the circumstances set forth above the said amendments should become effective immediately:

Now, therefore, *It is hereby ordered*, That the frequency allocation plan set out below for the frequency band 27.160-27.480 megacycles, be, and the same is hereby, adopted, effective immediately to supersede any plan heretofore adopted for the said frequency band or any portion thereof:

Band, Mc	U. S. Service-Allocation
27.160-27.430--	(a) Amateur. ¹
	(b) Industrial, scientific, Medical. ²
27.430-27.480--	(a) Fixed (non-Government). ¹
	(b) Industrial, scientific, medical. ²
	(c) Mobile (non-Government). ¹

¹ This service recognizes that interference to its operations within this band may result from the emissions on the frequency 27.320 Mc of industrial, scientific and medical devices.

² The frequency 27.320 Mc is designated for the operation of industrial, scientific and medical devices.

By direction of the Commission.
